

Double Dragon

Printed on May 26, 2025

Original Double Dragon

Very much has a screen emitter issue. I **really** hope its not a leak in the tube but it sure looks like it. Screen will fade on power after a few hours. So for now. Its unplugged.

On the bright side, the game, music and controls are all otherwise good. Things to check: HV supply on the tube, or just find a new tube.

Date: 2025-05-26, **Status:** Not-Playable
